Your complete, up-to-date manual is in your program folder, on your CD and on **WDeed5's** Help menu.

Installation

- A. Place the **WDeed5** compact disk (CD) in your CD or DVD drive. Installation should begin automatically. **If it does not**, follow the three steps below:
- (1) Press the **Start** button;
 - (2) Click on the **Run** item; and
 - (3) Type the following command: **D:\SETUP.EXE**
- Note:** The "D" in step 3 above represents the letter of the drive the CD is in. It may be different on your machine, *i.e.*, "F:\SETUP.EXE".
- B. The Setup progress meter appears briefly until the **Welcome** dialog displays. Click the **Next** button to begin installation. Click **Cancel** if you want to abort installation.
- C. The **Puritas Springs Software Licensing Agreement** appears in the next dialog. Click the "**I accept ...**" radio button to accept the terms of the license and click the **Next** button to continue. If you do not agree to the Licensing Agreement, installation will not continue.
- D. Verify or enter your customer identification information and click **Next**.
- E. Verify the installation directory. **We strongly recommend using C:\Program Files\Puritas\WDeed5 which is the default.** If you want to use an alternate installation directory or drive, you can use the **Change** button to make your selection. Click **Next** to continue.
- F. Verify the database directory. By "database" the *InstallShield* Wizard is referring to the place where you store your client WD5 files, templates and completed documents. **C:\Puritas\WDeed5 is the default.** Click **Next** to continue.
- G. The Setup Type dialog will appear next. For initial installations (*not* updates/reinstallations) leave it set to **Typical**.
- H. Installation begins when you click **Install** in the **Ready to Install the Program** dialog. A progress meter will keep you informed as the program files are transferred from the CD to your hard drive.
- I. When the installation process is complete, the **InstallShield Wizard Completed** dialog appears. Click on the **Finish** button.

Updating

Because laws change periodically, **WDeed5** automatically checks for updates each time you start it. If you are connected to the Internet *and* an update is available, you will be notified of that fact and given the option of choosing whether you'd like to download and install it at that time. If you select **No**, **WDeed5** will open as usual. You will receive the same notification the next time you start the program. If you select **Yes**, the update will begin to download and should see a bar meter showing you the progress of the download. When the file (**setupwdeed5.exe**) is completely downloaded, installation of the new version will begin and proceed automatically. It is no longer necessary to go to the **Control Panel** and manually remove the installed version in order to begin installing the new downloaded version. When the process is complete, you may restart **WDeed5** using any of the methods described in the following section.

Running WDeed5

You start **WDeed5** by (1) double-clicking* the **WDeed5** icon on the desktop, (2) clicking on the **Start** button, selecting **All Programs**, then the **Puritas Springs Software** submenu, and finally the **WDeed5** item, or (3) double-clicking* on any WD5 file, *i.e.* from *Windows Explorer*.

* Note that some *Windows* computers are set to execute icons with only a single click.

Tutorial

There's a section in the manual titled "Entering Information" that provides a detailed guide to completing and printing your documents. You can view and print your manual by clicking on the **Manual** item on **WDeed5 Help** menu. The PDF file that is the manual (wdeed5.pdf) can also be found in the program folder on your hard drive as well as on the distribution CD.
